PROFESSIONAL EXPERIENCE	Student Assistant in Research May 2025 – Present TU Wien (Technische Universität Wien) - Develop a Python-based simulator for modelling public transport systems, integrating LLM components with LangChain. - Support researchers with statistical analysis in Python, R, and SPSS. - Maintain back-end IT infrastructure, using Linux and Docker. Data Analyst Intern Nov 2022 – Oct 2023 INNIO Jenbacher - Developed analytics pipelines and automated manual reports, improving supply chain KPIs such as on-time delivery and item availability. - Performed ETL, preprocessing, analysis, and visualization of large supply chain datasets using SQL, R and Excel. Built interactive dashboards in Tableau.			
EDUCATION	TU Wien (Technische Universität Wien) Oct 2023 – Present Master of Science in Data Science GPA: 1.8 <i>Thesis</i>: developed transformer-based deep learning models for semantic segmentation of parking spaces in Vienna, using Python and PyTorch. <i>Research project</i>: trained machine learning models on satellite remote sensing data to correct noisy soil moisture measurements. NOVA University Lisbon Sep 2019– Jul 2022 Bachelor of Science in Information Management GPA: 17/20 - Awarded 3x Incentive Award for academic excellence, plus Nokia prize winner.			
TECHNICAL SKILLS	Python (NumPy, Pandas, scikit-learn, PyTorch), R (dplyr, ggplot2, shiny), SQL <i>Tools</i>: Git, Linux, Docker, Apache Spark, AWS, Tableau, Power BI, Microsoft Excel
