TECHNICAL SKILLS

Languages: Python, R, SQL, Bash

Frameworks: Apache Spark, PyTorch

Developer Tools: Git, Linux, Docker, AWS, Tableau, Power BI

Libraries: NumPy, Pandas, Scikit-learn, Hugging Face Transformers, LangChain, Streamlit, Shiny

EXPERIENCE

Statistics and Data Science Trainee

Mar 2026 – Present

European Central Bank, Directorate General Statistics

Frankfurt am Main, Germany

- Developing NLP- and LLM-based methods to improve the quality and consistency of metadata for over one million time series published in the ECB Data Portal.
- Developing a real-time dashboard in R Shiny for monitoring data dissemination to the ECB Data Portal, enabling early detection of delays and failures.
- Maintaining and extending production software and statistical applications, including codebases in Python and R, SQL databases, GitLab CI/CD pipelines, and Tableau dashboards.

Student Research Assistant

May 2025 – Feb 2026

TU Wien, Faculty of Civil and Environmental Engineering

Vienna, Austria

- Extended an agent-based simulator for public transport systems in Python and developed an LLM-powered interface with LangChain, enabling users to configure, run, and visualize simulations using natural language.
- Maintained and developed back-end IT infrastructure using Linux, Docker, JavaScript, and WordPress.
- Contributed to research projects through data analysis, resulting in co-authoring a publication.

Data Analyst Intern

Nov 2022 – Oct 2023

INNIO Group, Global Service

Jenbach, Tyrol, Austria

- Developed analytics solutions and automated reporting for global supply chain operations of spare parts, improving KPIs including on-time delivery and item availability.
- Performed ETL, data preprocessing, validation, analysis, and visualization of large supply chain datasets from Oracle and Azure sources, using R, SQL, Excel, and Tableau.

EDUCATION

TU Wien (Technische Universität Wien)

Vienna, Austria

M.Sc. in Data Science, Faculty of Informatics

2023 - 2026

- Developed CNN- and transformer-based models for semantic segmentation of aerial imagery for the master's thesis.
- Conducted research in remote sensing, applying machine learning to improve the quality of satellite-derived data.

NOVA University Lisbon

Lisbon, Portugal

B.Sc. in Information Management, NOVA IMS

2019 - 2022

- Recipient of the Incentive Award for Academic Excellence for three consecutive years and the Nokia Prize.
- Erasmus+ exchange semester at the University of Vienna.

CERTIFICATIONS

Microsoft Office Specialist – Microsoft Excel 2016

Issued Oct 2021
